

## Technology that Transforms Smart Utility Solutions

Multitech and ZENNER IoT Solutions demonstrate a NB-IoT-connected end-to-end smart waste demo-use-case.

- MultiTech MultiConnect Cell (NB-IoT Modem) simulates Smart Waste Sensor
- ELEMENT is an technology agnostic IoT platform by ZENNER IoT Solutions with advanced, customizable 3D map functions

### MultiTech and Zenner Demonstration

ZENNER IoT Solutions product portfolio completes the products and services of the ZENNER-Minol-Group, which offers IoT hardware products for the utility and real estate industry worldwide. ELEMENT, the application enablement platform made by ZENNER IoT Solutions features devices, sensors, actuators and gateways of independent manufacturers and technologies such as NB-IoT and LoRaWANTM. The IoT platform interconnects all kinds of different IoT devices and undertakes: management of network and devices as well as data aggregation and 3D visualizations.

MultiTech designs, develops and manufactures communications equipment for the industrial Internet of Things - connecting physical assets to business processes to deliver enhanced value. Our commitment to quality and service excellence means you can count on MultiTech products and people to address your needs, while our history of innovation ensures you can stay ahead of the latest technology with a partner who will be there for the life of your solution.
